

Minister

Minister's Address

(Date)

Dear (Minister's name)

The members of the P&C Association at (School name) believe that government policy must be focussed on what is best for Australian children and the Australian people and not be based on serving individual interest groups, segregation or ability to pay. We therefore request that the core focus of government policy and government funding be used for Public Education in order to achieve an equitable, cohesive and prosperous society.

We urge that the State government assist Public schools like ours where funds are needed to provide greater equitable learning opportunities.

Yours sincerely,

Name
